How to Display the Staff Resource History

Overview

This Quick Reference Guide shows how to display the Staff Resource History. The history provides information on devices associated to the staff and device status, location and user allocation in chronological order from deployment to the present time.

Work Instructions

To display the staff resource history follow the process below:

1. Click the Staff tab in the Device Management menu.

5. Click on a staff member in the list. The Staff Details screen displays the list of devices associated to selected staff.
6. Click on a device in the list, then click the **Device History** tab to see the history for the device
